

## Lost and Found | Part 03

### Texto para mineração e treinamento:

William and Zack were playing Adventure Seekers, which was basically **hide and seek** while wearing safari hats and supply backpacks. Their parents' rule was that they could not leave their particular campsite without permission. That gave them the thirty yards between their camper and the next. There weren't many hiding places in this small space. On Zack's turn to hide, his brother covered his eyes and counted to twenty, while Zack tiptoed out of the campsite and into the woods across the street. He watched from behind some bushes as his big brother searched everywhere in the campsite. Zack couldn't help but giggle that he'd outsmarted William, but as soon as he heard that laugh, William's head **whipped around**, following the giggle to Zack's spot in the bushes. William started to run toward his little brother, yelling that it was breaking the rules to be out of the campsite.
