

Duas retas distintas são concorrentes se, e somente se, elas têm um **único ponto comum**.

concorrentes

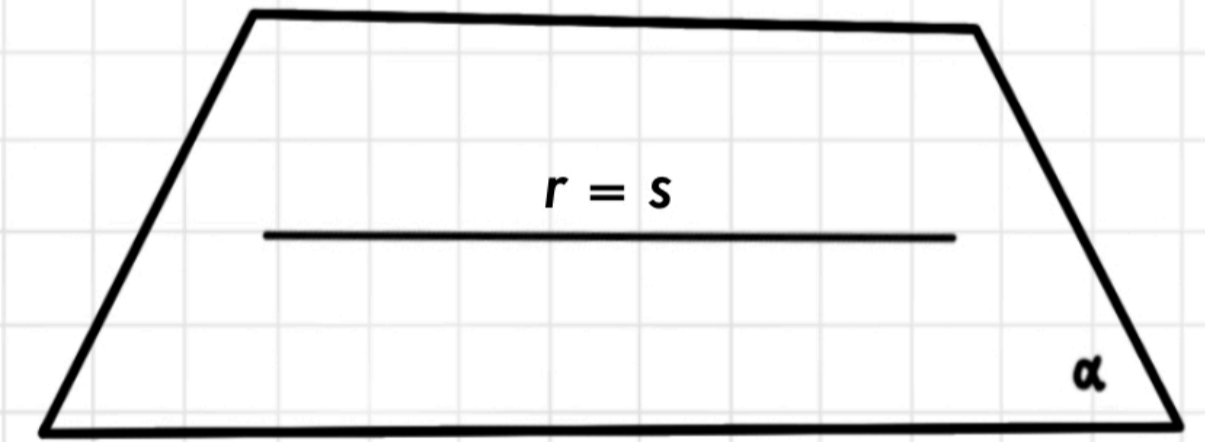

Se as retas r e s são paralelas entre si e distintas, então $r \cap s = \emptyset$. Simbolicamente, $r // s$ representa que a reta r é paralela à reta s .

reversas

Duas retas são reversas se, e somente se, **não pertencem a um mesmo plano**.

reta

r e s são coincidentes

paralelas

r e s são distintas
