

CARDINAL NUMBERS INTERMEDIATE AND ADVANCED

1. Read the excerpt from the video and answer the questions:

[Mr Teacher Paulo Jr] – Dad, these kids at my school are out of control sometimes! Yesterday I was at the cafeteria line waiting for my change and out of nowhere Jack and Mike started scuffling right behind me! Jack would scream that he was second! And Mike would say that there was no way he was third... there was such a commotion. 10 other boys from my PE class got up and took Jack's side and another... 1,2,3,4... 5, 6, 7! 7! Other boys from my home room took Mike's side. The cashier seemed so confused. All I wanted was my \$2.97 back and be out of there. Then the principal came in, everyone spread out, and that was it!

- a) How many kids seem to have been involved in the altercation?

- b) If Mr. Teacher Paulo Jr. had paid this lunch with a 5 dollar bill. Please spell out how much his lunch cost. (Tip \$5.00 - \$2.97 = \$3.03)

- c) How much did you use to spend on your lunch when you were in 5th grade? (Spell out all numbers and if you don't know you may make it up)

- d) Have you ever been involved in a scuffle? How many times? How many people were involved? Who was to blame? (spell out all numbers)

2. Please spell out the numbers below.
